SEASONAL TIRE STORAGE MANAGEMENT

It costs ten times more to find a new client than to keep an old one. Do you have any idea of the financial impact of having clients come back because you are storing their tires? And it's easier to sell more services to existing clients than to acquire new ones. **It's all about customer retention and additional business.** Don't send your clients somewhere else to store their tires. Call us for a demo... we'll show you what we mean!

HOW DOES TIRE STORAGE HELP INCREASE YOUR BUSINESS

You can increase your business, bring in more tires, which means bringing in more clients, which

Increase your business

means more tire changes, more oil changes, more brakes to change, more mechanical work. This system is of interest to Automobile, Truck and Bus service centres who change seasonal tires for clients. Suitable for any area north of North Carolina and California to the Arctic Circle (includes Canada, which is what this is all about)! If you are out of storage space or simply have no space, we can help you.

MORE SENIORS & JUNIORS

It's no surprise that the population is aging. Aging citizens are still driving yet their willingness and ability to move tires in and out of their car trunks is becoming more difficult. Not to say that as they move into condominiums, there is less and less space to store tires. Similarly, younger drivers are living in apartments and condos, again with little or no space to store tires.

Serving our Clients since 1984

LogiSTOR - HOW THE SYSTEM WORKS

1. Keeps track of an unlimited number of clients.
2. Each client/company can have an unlimited number of vehicles.
3. Client data retrieval – Lost tickets?
Upon arrival of client, the Customer Name, License Number, Driver Name, Ticket Number, or Telephone number is entered onto a search screen. No need to have a ticket to find tires. A list of clients is presented and the correct one is selected.
4. Vehicle is selected.
5. Operator selects what is to be done with tires.
6. Printer prints out labels for the tires with bar codes, mechanics tag (for comments), picking slips for mechanic or picking staff.
7. Labels are attached to tires and placed into storage in any available spot. The ticket and the location are scanned.
8. Scanners are downloaded at regular intervals during the day.
9. Database is updated at each upload.
10. Reports are generated upon request.

SYSTEM ADVANTAGES

1. Reports allow user to
 - a. Create a list of those who have not returned to change their tires within a range of dates... i.e. people to call for appointments, etc.
 - b. Generate a list of all tires in storage and their location
 - c. List transactions for a given day, week or any selected period of time
 - d. Retrieve any stored data with custom designed reports
2. Fill all empty spaces in storage facilities
 - a. Save up to 25 % of warehouse space
 - b. Allows you to accept more clients and more new business.
3. Eliminate unnecessary tire movements
 - a. Becomes unnecessary to hire additional people to move tires to fill spaces
 - b. Less tire movements can result in less potential claims to CSST
4. Be able to find any Storage ticket in a second
 - a. Eliminates need for hard copy boxes of tickets
 - b. Eliminates possibility of packs or tickets falling on floor and trying to put them back in order
5. Find tickets by
 - a. Customer Name
 - b. License Number
 - c. Driver Name
 - d. Ticket Number
 - e. Telephone Number
 - f. Vehicle ID number
6. Be able to locate tires in seconds
 - a. No more wasting time looking for tires when using our location system
 - b. Reduce valuable mechanic's time looking for tires
 - c. Reduce client's waiting time.
7. Be able to move tires at any time and know where they are
Our scanning system keeps track of where the tires are and uploads the information into your desktop computer.
8. Find missing tires
By completely scanning a warehouse, the location of all tires will be identified and updated... even "missing" tires.

9. Be able to take an inventory
Scanning a warehouse will update the list of all tires in the warehouse
10. Prints tickets and labels
 - a. No manual illegible handwritten tickets
 - b. Prints bar coded labels with customer and tire information in large bold lettering to be applied to tires, and given as a receipt to client, self-adhesive labels stick to invoice
 - c. Prints picking slips for quick locating of tires
 - d. Prints information slip for mechanic to update tire storage record.
11. Never need to stock (or run out of) pre-printed tickets
 - a. Our system prints tickets with your company name and customer information on blank labels or tickets.
 - b. The number of tickets printed is customizable.
